## Osteopathic care when you need it most

The ESO Clinic now offers a Saturday morning clinic for patients suffering with acute problems who can't wait for a weekday appointment.

The Saturday Clinic will be staffed by fully qualified, graduate osteopaths and will be available between 9am and 1pm. Patients can continue to be treated on a Saturday if space is available, otherwise they will be referred to the main teaching clinic for ongoing treatment.

Each appointment will be 40 minutes in length. As practitioners are graduate osteopaths, fees will be charged at a slightly higher rate - please visit our website for details.
